EDUCATION

Florida International University
Bachelor of Science in Computer Science

Miami, FL
Jun. 2022 – Aug. 2026

EXPERIENCE

Software Engineering Intern

Sep. 2024 – Dec. 2024

Koombea

Miami, FL

- Built and scaled features for a **Fintech SaaS platform** using React and Node.js, cutting dashboard load times by **20%** through improved state management and API efficiency.
- Created modular React Native components** for a mobile savings app, boosting development speed by **15%** through standardized UI patterns and global state handling.
- Led Agile Sprints** and technical reviews, delivering **95% of assigned tasks** on schedule while maintaining strict production security and performance standards.

Software Engineering Intern

Jun. 2023 – Aug. 2024

JMG Custom

Miami, FL

- Designed and built an **enterprise time-tracking system** using Java and PostgreSQL, integrating Toggl APIs to automate labor data sync across internal tools.
- Improved backend reporting workflows**, leading to a **20% increase** in data accuracy and saving **15%** of manual logging time via automated background services.
- Maintained 99.9% system uptime** by managing production infrastructure and fixing critical backend bottlenecks for 24/7 client access.

PROJECTS

Voxtant | *Next.js, Python, spaCy, MediaPipe, OpenCV, PostgreSQL, Docker*

Oct. 2025

- Placed 1st of 80+ projects** at **PlutoHacks 2025** for an AI interview coach that scans live job listings to create tailored mock interviews and technical assessments.
- Built a custom agent workflow** to handle real-time evaluations, cleaning large-scale job data for accurate question generation and automated scoring.

Helios AI | *Python, TensorFlow, Scikit-Learn, Raspberry Pi, GPIO, Robotics*

Oct. 2025

- Placed 1st Winner** at **Knight Hacks VIII** (UCF) for building an autonomous 360-degree solar platform that tracks the sun to maximize power capture.
- Developed a CNN-based tracking model** with TensorFlow to find optimal light vectors, increasing energy yield by **30%+** over traditional static panels.

ViewGuard | *YOLOv8, Gemini 2.0 Flash, TensorFlow.js, Python, React, FastAPI*

Nov. 2025

- Built a real-time security pipeline** for **SharkByte 2025** that chains YOLOv8 for high-speed detection with Gemini 2.0 Flash for instant behavioral analysis of incidents.
- Managed asynchronous data streams** from multiple feeds, using TensorFlow.js to visualize instant telemetry spikes and anomalous activity with zero-latency updates.

Shadow Vision | *Python, TouchDesigner, OpenCV, MediaPipe, TensorFlow*

Sep. 2025

- Built a **real-time computer vision system** for **ShellHacks 2025** that uses hand gestures to drive interactive digital puppets and point clouds.
- Published a custom open-source dataset** for training and validation after finding no existing public data, achieving **90%+ accuracy** across various lighting conditions.

TECHNICAL SKILLS

Certifications: Microsoft Azure AZ-500 Security Engineer (Earned via 1st Place CTF Finish)

Languages: Python, Java, SQL, C++, JavaScript, TypeScript, C#, HTML/CSS, R, Go, Bash, Rust

Cloud/Security: Azure, AWS, GCP, Cloud Security, Penetration Testing, IAM, Network Security, Docker

Frameworks/Libraries: React, Next.js, Node.js, Spring Boot, Flask, FastAPI, Tailwind, Redux, Django, TensorFlow, PyTorch, Keras, Scikit-Learn, OpenCV, MediaPipe, Hugging Face, JAX, GraphQL, REST APIs, Socket.io

Tools/Databases: Git, PostgreSQL, MongoDB, Redis, Linux, Kubernetes, Terraform, Raspberry Pi, VS Code
